	Examiner James M. Hewitt	Art Unit 3679	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

Applicant is reminded of the proper language for an abstract of the disclosure.

The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided.

Claim Objections

Claim 4 is objected to because of the following informalities:

In claim 4, line 3, "socket" should be "sockets".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3679

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Durigon (EP 0 745 0744 A1).

Durigon discloses a directional control means for submerged surface suction cleaning apparatus comprising an elbow joint (154) for insertion between a cleaning apparatus and a flexible hose, wherein each end of the elbow includes a swivel connection (see col. 6, ll. 50-57) and inlet and outlet ends inclined to each other at 135 degrees. The inlet and outlet ends provide spigot/socket connections. The swivel connections between the elbow and the inlet and the outlet ends are formed with anti-friction surfaces. Durigon fails to teach that the angle between the inlet and outlet ends is between 150 and 165 degrees. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Durigon's elbow (154) such that the angle between the inlet and outlet ends is between 150 and 165 degrees.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
